Western Tidewater	35	68.6%	60.0%	85.7%

There are two “scales” or sets of questions used on the family survey. One scale is called “Impact on Families Scale”. This scale measures the extent to which early intervention services help families achieve positive outcomes, including those that must be reported to the Office of Special Education Programs (OSEP) annually. The percentages reported above are derived from the “Impact on Families Scale.” The other scale is called “Family-Centered Services Scale” and measures the quality of family centered services provided to families. For more details regarding these scales and the family survey itself, please refer to these reports:

[Analysis of the Virginia Family Survey Data Addressing Part C SPP/APR Indicator #4: Final Report](#) (The table above is from this report.)

[2007 Family Survey Explanation of Results](#)

* In order to ensure the confidentiality of respondents and high confidence that the results accurately reflect the status of the local system, percentages are not reported for local systems with a total number of respondents (N) of 15 or less.
