

## SUMMARY OF STATE AND LOCAL RESULTS ON VIRGINIA'S MONITORING INDICATORS FFY 2005 (July 1, 2005 – June 30, 2006)

In accordance with the Individuals with Disabilities Education Act 2004 (IDEA), each state must have in place a [State Performance Plan \(SPP\)](#) to evaluate the state's efforts to meet the requirements and purposes of the implementation of IDEA. The SPP is a six-year plan and is based on 14 indicators. The Office of Special Education Programs (OSEP) in the U.S. Department of Education requires that states report their performance annually to OSEP in the [Annual Performance Report \(APR\)](#). States are also required on an annual basis to report publicly on the performance of each local early intervention system (EIS) compared to the State Targets on some of the SPP indicators (see below).

### Guidance on use of the information presented in this chart:

- **1. Timely Initiation of Services:** Percent of infants and toddlers with Individualized Family Service Plans (IFSP's) who receive the early intervention services (EIS) listed on their IFSP's within 21-calendar days from the date the parent/guardian signs the IFSP. Calculations are based on the number of children who receive **ALL** EIS listed on their IFSP within 21-calendar days. The data source for this information was a local record review completed in August 2006 on children who had their initial or annual IFSP between November 1, 2005 – June 30, 2006.
- **2. Primary Service Setting:** Percent of infants and toddlers with IFSP's who primarily receive early intervention services in the home, community settings or locations where typically developing peers are located. The data source for this information was the "Primary Service Setting Data" report from the Infant Toddler On-Line Tracking System dated December 1, 2005.
- **Child Find:**
  - **5. 0-1 years:** Percentage of infants and toddlers birth to 1 with IFSP's compared to the same age within the local population. Children served by the Public Schools ages 0-1 year are included in the calculations. These percentages must be compared to the state target.
  - **6. 0-3 years:** Percentage of infants and toddlers birth to 3 years with IFSP's compared to the same age within the local population. Children served by the Public Schools ages 0-3 years are included in the calculations. These percentages must be compared to the state target.The data source for the local population data is from [http://www.ojdp.ncjrs.org/ojstatbb/ezapop/asp/comparison\\_selection.asp?selState=1](http://www.ojdp.ncjrs.org/ojstatbb/ezapop/asp/comparison_selection.asp?selState=1) December 2005. The data source for the Child Count was "Percentage of Children Per Council by Age Group and Race of Infant by Age"; Infants Active on 12/1/2005" from the Infant Toddler On-Line Tracking System and the December 1, 2005 Child Count report from the Department of Education (number of children served by ages 0, 1 and 2 years by local school districts).
- **7. 45-day timeline:** Percentage of eligible infants and toddlers with IFSP's for whom an evaluation and assessment and an initial IFSP meeting were conducted within 45-calendar days from the date of the referral to the Part C system. The data source for this information was "Number of Days from Referral to IFSP by Council", "Children Exceeding 45 Day Timeline with Mitigating Circumstances" and "Referrals Not Yet Evaluated" from the Infant Toddler On-Line Tracking System dated April 1, 2006 – June 30, 2006.
- **8. Transition:** Percentage of children exiting Part C who received timely transition planning to support the child's transition to preschool and other appropriate community services by their 3<sup>rd</sup> birthday.

- o **a. Steps and Services listed on the IFSP.** Percentage of IFSP's that had had documentation of the transition steps and activities from the initial IFSP to the child's discharge from Part C services. Transition is to be discussed at each IFSP meeting and review of the IFSP.
- o **b. Notification to the Local Education Authority (LEA).** The number of children exiting Part C and potentially eligible for Part B where notification to the LEA occurred. Information **required in the notification includes: child's name, address, phone number and date of birth.**
- o **c. Transition Planning Conference.** Number of children exiting Part C and potentially eligible for Part B where the transition conference occurred with parent consent. The purpose of the transition conference is to provide families with the community options available for their child when Part C is no longer serving the child. This meeting must be held at least 90 days prior to and not later than 9 months before the child's discharge from the Part C system

The data source for this information was a local record review completed in August 2006 on children who have exited or will exit the Part C system between January 1, 2006 and September 30, 2006.

- To view the performance of an individual early intervention system, click on the name of the early intervention system. You will be directed to an individual profile for that system.
- To find out more information about each of the monitoring indicators, click on the indicator and you will be directed to the section within Virginia's Annual Performance Report related to the monitoring indicator.
- Location of Virginia's State Performance Report and Annual Performance Report may be found on [www.infantva.org](http://www.infantva.org). Click on "What's New" and click on FFY 2005 Public Reporting.
